Attorney General John Ashcroft

US Department of Justice

950 Pennsylvania Avenue, NW

Washington, DC 20530

Dear Mr. Ashcroft:

The Microsoft antitrust case has been active for over three years. At last, there is a fair and equitable proposed settlement released by the Dept. of Justice. I highly recommend endorsement of this settlement.

The Microsoft Company has agreed to every provision of this proposed settlement that resulted from negotiations with a court-appointed mediator. Microsoft's competitors should be pleased with the basic provisions that will allow them access to Microsoft Windows protocol, programs, and documentation thereby enabling them to link their non-Microsoft software to Windows. Further prolonging of this case should be avoided so that the IT industry can once again fully focus on innovation without the burden of litigation.

I look forward to a fair and equitable settlement in the near future. Thanks you for your consideration.

Sincerely,

J0014151\_0002
